## EUROGUSS 2018 Trade Show Review

→ [www.trennex.de](http://www.trennex.de)

*"January is over and the 2018 EUROGUSS is now behind us.*

**TRENnex, I LIKE IT!**

*Many visitors paid tribute to this motto by visiting our booth at the 2018 trade show in Nuremberg. We would like to take this opportunity to thank everyone who stopped by our booth during the show."*

Helmut Geiger, Managing Director

The positive discussions we had were a confirmation of our current path that has given us continued growth over the past few years. Compared to previous trade shows, the number of visitors to our booth increased once again and we were very happy to see a high volume of visitors in the first two days of the trade show.

Even though - since the time was just too short- all conversations may not have been fully finished or all topics completely covered, I still believe that the show was a success to all involved because it confirmed the successes from 2016/2017 and gave us a confident look into what the future brings.

It was also very noticeable how international the trade fair has become, in terms of the

companies present as well as the visitors in attendance. This allowed us to welcome our large number of German customers as well as our European and non-European customers to our booth, which really shows how important the EUROGUSS trade show has become.

As a purely die-casting trade show, the EUROGUSS will definitely remain an important meeting point for all those interested in keeping up-to-date on die-casting technologies.

We look forward to the large number of projects and tasks that await us in 2018 and look forward to the challenges that they bring.

We stand ready as a competent and high-performing partner to solve any challenges you'd like to bring to us.
