CHINA DIECASTING 2018 Trade Show Review

→ www.trennex.cn

→ www.trennex.de

Very hot.
Very big.
Very well attended.

These key words describe this year's trade show in Shanghai very well.

We would like to take the time to thank all the visitors from China and the neighboring countries for the interesting conversations that we shared at the trade show."

Helmut Geiger, Managing Director

We would like to take the time to thank all the visitors from China and the neighboring countries for the interesting conversations that we shared at the trade show.

As the largest die casting market in the world with plenty of growth potential, China offers a challenge that we as a release agent supplier enjoy handling.

Trennex has been present in China for over 10 years. In order to further establish our brand there and in order to get even closer to our customers on-site, we took the following measures over the past few months:

- » New salespeople in order to guarantee an even higher level of customer service

- » Partial production on-site in order to further increase product availability
- » Product developments specific to the requirements of the Chinese die casting industry

Electromobility and increased environmental protection were main topics during China Diecasting 2018. Together with our Chinese colleagues on-site, we rise to these challenges and look forward to continued success in the Middle Kingdom.

If you weren't able to speak with us at the trade show, please get in touch now.

We are at your disposal for any further information that you may need.
