Teilemacherei GmbH

3rd Price

Category Zinc

Clamp plate

Dimension (LxWxH)	200x145x32 mm
Weight	750 g
Alloy	Z410

Despite the – in our opinion certainly appropriate – decision to postpone the Euroguss to June, one attraction happening in this context nevertheless took place: The awarding of prizes for castings at the European Die Casting Awards. This European die casting competition organized by the Verband Deutscher Druckgießereien e.V. (VDD) aims to honor die cast products made of aluminum, magnesium and zinc that are particularly innovative and technically sophisticated.

In this context, we were pleased that again some of our Trennex customers received awards this year, and we would like to take this opportunity to congratulate **Albert Handtmann Metallgusswerk GmbH & Co. KG** in Biberach, **Torun Bark Magnesium GmbH** in Schömburg, and **Teilemacherei GmbH** in Heilbronn for their prizes.

The award-winning castings show that die casting is constantly finding new applications regarding the reduction of costly production steps and saving weight.

We are pleased that we have been able to make a small contribution with our products to the success of the respective efforts and that they have been recognized in this way.

In the end, we hope that the situation will have eased by June, and want to express our pleasure with which we look forward to the Euroguss in – hopefully - usual manner. Certainly, after this long period of limited contacts, for sure there will be much to talk about and discuss.
