

# Certificate

for the green electricity supply with  
**„Profi XL Naturstrom“**  
for

## Supply period:

The green electricity is generated entirely from environmentally friendly hydropower plants and is fed into the European interconnected grid.

To clearly identify the generation plants, the natural electricity is backed by guarantees of origin that comply with EU Directive 2009/28/EC.

The green electricity product "Profi XL Naturstrom" is certified by TÜV NORD CERT GmbH on the basis of the VdTÜV basic guideline "Ökostromprodukte" leaflet 1304 and is subject to an annual audit.
